

ABOUT

Full-stack design and researcher, the combination between user experience design, visual design, interaction design, front-end development and the understanding in research methodologies.

I start work with my passion in these field of work for 7 years since I graduated from high school by being a freelance designer.

I've learned and developed myself from working with varied problems and many talented people. Which these things encourage me to keep developing myself and eager to learn new things and always wanted to work with more challenging problem.
